

CASE STUDY

UNIVERSITY OF WORCESTER

Continuous improvement approach leads to recycling and waste benefits

CHALLENGE

Having worked with i-Clean Systems to benchmark the recycling and waste requirement across the campus and undertaken a tender process for the services, the University now needed to measure, record and drive continuous improvement across the facility.

At the same time there was a requirement to engage with the third sector, the circular economy and develop some alternative closed loop recycling solutions whilst reviewing progress across the whole campus.

SOLUTION

The University engaged i-Clean Systems to undertake a “recycling and waste continuous improvement review” that would report on all aspects of recycling and activity across the campus. This included a review of the providers who were successful in the earlier tender process and the solutions being provided currently.

RESULT

A closed loop solution has been developed with a charity who are re-using redundant furniture in their work with people facing social difficulties. The University are also sending students to this charity to obtain work experience in their specialist fields. Over the past 2 years the University has engaged with another charity to provide “free of charge” bag solutions for students at the end of year clear out. This ensures more items are re-used and recycled and more importantly benefits the charity.

The University are considering greener purchasing solutions for mattresses and are trialling a re-use process for pens.

“The costs associated with recycling and waste have again been reduced and recycling rates are on the increase against a back drop of expansion in buildings and infrastructure. Through our work with i-Clean Systems we now have an independent verification of our data and more access to alternative solutions in the market place. This gives us confidence to move forward with our recycling vision and implement some of the other strategies that we and i-Clean have put forward”

Tom Taylor – Assistant Director Security and Operations University of Worcester

ABOUT UNIVERSITY OF WORCESTER

The University of Worcester has established a reputation for world-class teaching and practical, purposeful research, delivering degree programmes to nearly 10,000 students and employing more than 1,100 staff members.

The University has undergone significant growth over the last few years, expanding into new subject areas, more than doubling student numbers and investing substantially in staff and new facilities.

ABOUT US

i-Clean provide independent best practice benchmarking of cleaning, recycling and waste services to organisations in all sectors, helping clients improve standards, reduce costs and ensure best value for money.

With demonstrable experience throughout the spectrum of education, i-Clean has worked with independent and state schools to further and higher educational institutions.
